

American Speech-Language Hearing Association states TeleSpeech is a form of teletherapy that uses “tele-communication technology to deliver professional services at a distance. TeleTherapy may be used to overcome barrers of access to services caused by distance, unavailability of specialists and/or sub-specialists, and impaired mobility.”

Why TeleTherapy?

- ✦ Get help no matter where you live
- ✦ Easy to get connected
- ✦ No extra charges for online services
- ✦ Convenient for families with busy schedule
- ✦ Comfortable in your home, school or work setting
- ✦ Great solution if you cannot find a therapist locally
- ✦ Proven to be just as effective as face-to-face treatment
- ✦ Nationally certified and state licensed therapists

How Does TeleTherapy Work?

- ✦ **TeleTherapy uses computers to connect children, families & teachers to therapy from a distance.**
- ✦ **Using a standard web camera and online video connections, our therapists connect with you in your home or school to provide therapy services.**
- ✦ **Our TeleTherapy offers “live” interactive face to face therapy, coaching and consultation from a distance, using your computer in your home or school.**

Effectiveness

Many studies have been done to prove that teletherapy is just as effective as face-to-face therapy. When properly used, the results are the same. The online session can be recorded for review later by teachers or other family members at any time.

Speech TeleTherapy
